

2017 CPLC SUMMER SCHOOL

MULTISCALE APPROACHES TO QUANTIFYING AND MODELING THE LIVING CELL

Offered by the NSF Physics Frontiers Center for the Physics of Living Cells (CPLC)
University of Illinois at Urbana-Champaign

July 16 – 22, 2017

The mission of the Center for the Physics of Living Cells at the University of Illinois is to create a quantitative, predictive, and physically-based description of living systems. The 2017 CPLC Summer School will offer multi-scale training in the latest experimental, computational, and theoretical biophysical approaches to six *Scientific Themes* on:

- Evolution of Chemotaxis
- Live Cell Imaging of Transcription
- Neurobiology
- Physics of DNA
- Quantitative Imaging and Cell Simulation of Small Regulatory RNA
- RNA Regulation in Eukaryotes

This summer school is designed for graduate students, postdoctoral fellows, and researchers in physics, biophysics, chemical and life sciences, and engineering who seek to expand their research skills into these areas. The workshop will comprise lectures and hands-on training in specific topics and tools.

To learn more and apply, please visit <http://cplc.illinois.edu/summerschool>

Application Deadline: extended to April 1, 2017

Selection and notification of participants by late April 2017

Registration Fee: \$100 students; \$175 postdocs; \$250 all others

Housing and all course materials will be provided.

PARTICIPATING FACULTY

Alek Aksimentiev

Yann Chemla

Jingyi Fei

Martin Gruebele

Aaron Hoskins

Nigel Goldenfeld

Ido Golding

Taekjip Ha

Seppe Kuehn

Tom Kuhlman

Zaida Luthey-Schulten

Sua Myong

Paul Selvin

Anna Sokac

Jun Song

Kai Zhang
